

INTRODUCING AGAPI 800 THE NEW LEVEL OF AWARD WINNING 750

The awarded Agapi 750 was the innovative boat that created a new niche within boating. A safe and easy to handle, trailerable family oriented boat combined with an outstanding performance. It opened up new dimensions for modern boaters in several markets and won "Boat of The Year- People's choice" in Sweden 2013. After three seasons it is time to take it to next new level. The new Agapi 800 is the result of product development based on a thorough evaluation together with our design team and our users. The praised hull designed by Håkan Södergren has gained some length and the deck and cabin looks deceptively much the same in a first glance but the updates are numerous.

The new 800 is precisely as its predecessor a unique top class performance, lightweight and fuel-efficient boat that fits a modern boating lifestyle. It is also the proof of Agapi's core values to relentlessly continue to improve the boating experience. Agapi boats combine the RIB concept (Rigid Inflatable Boat) with a comfortable cabin, trailer-ability, intelligent Swedish design and high-tech materials, offering a unique range of user benefits that no other boat can match. And like every other previous and upcoming boat in the Agapi family, the 800 is also very kind to the wallet when it comes to maintenance costs.

Looking back over 2015, Peder Asplund, CEO of Agapi says: *2015 has been a very exciting and rewarding year. We began by starting up production with our new partner, Delphia Yachts in Poland and continued by celebrating the nomination of our Agapi 950 for "Best of Boats International Awards 2015" which has been a confirmation to us that we are on the right track. International press has highlighted the*

benefits of our boats and concept to be totally in line with the demands of modern boating. The new Agapi 800 is an important milestone and the first boat developed together with Delphia Yachts and Södergren Group. It's simply a great boat that needs to be experienced!"

The Agapi 800 at a glance

The Agapi 800 is built with lightweight technology which offers low fuel consumption. The RIB technology and the hull design gives the boat a nimble and sporty character as well as an easier and safer drive in all conditions compared with conventional boats. It's available with single outboard engine up to 300HP with performance exceeding 50 knots. With its 26 feet this RIB hybrid boat is fit to handle more open seas and family leisure fun than you would normally expect from a 26 footer. It is no problem to bring both friends and family, the maximum load is 10 people, and even with them all on board the 800 is amazingly easy and fun to handle.

A clear vision and intelligent Swedish design have created a highly versatile performance boat with plenty of room to socialize and enjoy. Space for up to 4+2 beds, a kitchen, fridge and flush toilet (option) make the Agapi 800 very comfortable.

The Agapi 800 can be trailered behind a family SUV such as the BMW X1, Audi Q3 or similar. The trailer has been especially developed for the boat so it's surprisingly fast and simple to load the 800 on the trailer and to launch it, which opens up the chances to explore new and more waters!

Founded in 2006, Agapi Boating is a Swedish company with the vision of creating a completely new kind of boat life. Since the launch of our first boat, we have been setting a new course in boating. In 2010 we were awarded 'Rookie of the Year', in 2013 our Agapi 750 was awarded 'Motor Boat of the Year - People's choice' and in 2015 our Agapi 950 was nominated "Best of Boats International Award". For us, boating is about one thing - **freedom**. This is why we have taken out a new course for the design and manufacture of high-performance, fuel-efficient family boats with an unbeatable mobility that we offer with new ownership and service solutions for a simple and fun boating life!
